System Administrator and Controller User Stories

- I want to log in so I can securely access system data.
- I want to be able to add journeys to the system so that customers can book tickets for them.
- I want to be able to modify existing journey records so that I can update departure times to account for delays.
- I want to be able to remove cancelled journeys from the system so that accidental booking cannot occur.
- I want to be able to add a new train record to the system so that it can be assigned to a specific route.
- I want to be able to modify an existing train record so that the status of the train is accurate on the system.
- I want to be able to remove a train record so that trains that are no longer in operation are not accidentally assigned to a journey.
- I want to be able to create staff accounts so that personal details of members of staff are stored.
- I want to be able to modify staff accounts so that changes to personal details are accurately stored.
- I want to be able to archive staff accounts so that staff are not assigned tasks if they are no longer employed.
- I want to be able to add a new station record so that journeys can be planned to the new location.
- I want to be able to modify an existing station record so that the status of the station is accurately stored and can be read.
- I want to be able to remove a station record if a station is shut down so that journeys cannot be booked for that destination.

Controller Specific User Stories

- I want to be able to assign a train to a specific journey so that journeys can take place on time.
- I want to be able to assign a member of staff to a specific train so that the member of staff can carry out their duties.
- I want to be able to assign a guard to a specific station so that they can validate tickets in that location.
- I want to be able to receive notifications of a driver's changes to a journey so that I can appropriately alter the schedule in response to delays.
